Investment Strategy

- Quantitative approach to select stocks with the best growth and value characteristics (earnings growth, reinvestment rate, positive analyst revisions, and earnings stability)
- Aim is to "Put the Odds in your Favour" by selecting stocks with higher probability of outperforming based on quantitative screening and technical analysis
- Technical analysis to determine sector and geographic allocations and relative market exposure
- Ability to use hedging instruments to reduce volatility and to enhance income
- Active currency management
- Active tactical allocations to enhance returns
